Course Curriculum

Advanced Skills On iOS Apps Development

Course Description:

We designed this course with iOS App Development completely. This course is based on in-person app development Bootcamp is where you can get the perfect curriculum. It will help you to use coding swiftly. The curriculum has been completed. You will know how to use your Core Data, Realm, Codable, and user defaults to store your app data. You will get the opportunity to purchase with Apple StoreKit Machine Learning.

Course Requirements:

- No programming experience needed - I'll teach you everything you need to know

- A Mac computer running macOS 10.15 (Catalina) or a PC running macOS.

- No paid software required - all apps will be created in Xcode 11 (which is free to download)

- I'll walk you through, step-by-step how to get Xcode installed and set up

Course outline:

- Introduction to apps development

- iOS apps

- Xcode 11

- Develope your app

- Register the app

What you'll learn:

- Be able to build any app you want

- Start your own app-based business

- Create a portfolio of apps to apply for junior developer jobs at a technology company

- Become a digital nomad by working as a freelance iOS developer

- Learn to work with Apple's latest UI Framework - SwiftUI

- Master creating Augmented Reality apps using Apple's new ARKit

- Create apps that use Machine Learning using Apple's new CoreML

- Master app design so you'll know how to wireframe, mockup and prototype your app idea

- Master app marketing so you can publish your apps and generate downloads
  Build any app and develop it.

- Start your own app-based business. Create a portfolio of apps to apply for junior developer jobs.

- Become a digital nomad by working as a freelance iOS developer. Learn to work with Apple's latest UI Framework.

Who this course is for:

- Beginners who are interested in coding then this is the right course for them. Amateur programmers, app developer can join the course.
